Abstract - This study examine the relationship between characteristics and job satisfaction among Arts College library professionals in Madurai district, Tamil Nadu. The questionnaire method is followed. The experienced library professionals are more satisfied than less experienced. Professional with high level qualification is more satisfied with job than with less qualification. The present study intends to find out the job satisfaction of professional library staff working in the college libraries of Madurai district. It is found that majority of professionals strongly agree with job satisfaction level.

Keywords : Job Satisfaction, College library, Questionnaire method

I. INTRODUCTION

A happy employee is generally a employee who is satisfied with his job. Job satisfaction is very important because most of the people spend a major portion of their life at their working place. Library professional plays an important role in the higher education sector for dissemination of information to the information seekers. Information need has been widely enlarging due to creation of new findings and development.

Library professional's satisfaction is required for better functioning of a library, because without peace of mind, productive result cannot be expected from a library professional. Hence, this study is important to sort this kind of problem at the beginning stage.

II. SCOPE OF THE STUDY

This study covers the library professionals of University College, University Constituent Colleges, Government Colleges, Government Aided Colleges and Self-Finance Colleges spread over the entire Madurai district. There are 27 colleges in the district and in the present study an attempt is made to determine the job satisfaction of the college librarians of Madurai district.

III. OBJECTIVES OF THE STUDY

The main objectives of the study are

1. To study the job satisfaction level of library professionals working in Arts and Science Colleges in Madurai district, Tamil Nadu.

2. To gain an insight into the socio demographic profile of the respondents in terms of age, gender, educational qualification, years of experience etc.
3. To compare the library professionals jobs satisfaction in Madurai district.

IV. REVIEW OF LITERATURE

Ram and Choudhury (2010), examined the relationship between organizational climate and Job Satisfaction in academic libraries in Delhi. 228 questionnaires are collected from professional, technical and administration people from different libraries. The finding of this study is that Job Satisfaction is highly correlated with organization climate. Alan sari, (2011) investigated the factors affecting career choice, job satisfaction and perceptions of the public image of librarians in Kuwait. Data is gathered via questionnaires sent to 117 professional librarians working in academic, public and special libraries in Kuwait. It identified the factors which influenced the choice of career, sources of satisfaction and dissatisfaction. Respondents reported that they are moderately satisfied with their current job. The results shows that extrinsic measures, such as recognition of accomplishment, fair performance evaluation and job security are ranked in the top and are the most important aspects of job satisfaction, whereas intrinsic measures, such as suitable daily working hours and nature of work fell close to the bottom of the list. The cause of employee job satisfaction occurs in the area of benefits, contingent rewards, communication, salaries, working conditions and promotions. Balasubramanian, (2011) studied the Job Satisfaction of Librarians in Tirunelveli. He stated that the Job Satisfaction refers to an individual's complex reaction towards his job. It seems eminently logical that a happy employee is a better employee. This article studied about Job Satisfaction of Library professionals.

The study concluded that job satisfaction of an employee is related to an individual's expectations and attainment of their perceptions. Khan and Ahmed (2013) conducted a study to measure the job satisfaction of library professionals serving in public sector Universities of Khyber Pakhtunkhwa, Pakistan. A total of 49 responses are collected and analyzed. The study reveals that although library professionals working in these institutions are slightly satisfied with their nature of work, they are dissatisfied with supervision, benefits, promotion, revision of service structure, promotion policies, improvement in

academic qualification and advance training are suggested by the researcher.

V. METHODOLOGY

For analysis and interpretation of the data collected, tables, diagrams and simple statistical tools such as survey method, questionnaire method and observation methods are used.

VII. FINDINGS

1. Majority of professionals strongly agree with job satisfaction level.
2. Qualification of librarians in Ph.D level should be increased.
3. Satisfaction of salary those who are working in self-financing colleges is very low.
4. Security of job those who are working in government and government aided colleges are highly secured.

VIII. SUGGESTIONS

1. Skill development level should be improved to secure their position those who are working in self-financing colleges.
2. Salary should be increased to self-financing college librarians.
3. Additional incentives and increments should be given to self-financing college librarians those who are publishing journal articles and paper presentation in seminar.
4. Some librarians should maintain good relationship with co-workers.

IX. CONCLUSION

An employee who is satisfied with the job generally extends his both mental and physical efforts towards the accomplishment of objective of the organization. Job satisfaction of an employee plays an important role in the development of its organization. The college authority should encourage the librarians through deputing them to attend training programs, seminars and conferences so that they may be acquainted with latest technology. It facilitates to develop the working skill of the staff concerned. The management should take necessary measures to provide infrastructural facilities in libraries where they lack for better utilization of professional knowledge or skills in order to enhance their job satisfaction. The above study shows that library professionals working in Madurai district are more satisfied with their library job.
